

The Carbon Chronicle

VOLUME 36: No. 19

ACME, ALBERTA, THURSDAY

JUNE 6th, 1957

\$1.50 a Year; 5c a Copy

The Duke of York Chapter I.O.D.E. wish to thank the people of Carbon and district who so generously donated to the Cancer Fund. The amount collected was \$292.55.

Mrs. R. Heath of Victoria, B.C. is visiting at the homes of her brother and sister-in-law Mr. and Mrs. Len Poxon, also at the home of Mr. and Mrs. Fred Bessent.

We are glad to report that Mrs. Doris Bramley has returned home from hospital. We wish her a speedy recovery.

The Ladies' Auxiliary 161 will hold a Sale of Home Cooking Sat. June 22nd in the Legion Hall, 7 to 9 p.m.

The first Horse Races and Chuck Wagon Races will be held in Carbon Wed. June 19. Come one and all and enjoy these grand races. Also races for children, tug of war—every kind of sport. Don't forget the date—June 19th at Carbon.

Mr. Tom White has returned after his recent visit with his son and daughter-in-law Mr. and Mrs. George White.

Mr. and Mrs. E. Cannings and children of Calgary were weekend visitors at the home of their parents Mr. and Mrs. S. Cannings.

Mr. and Mrs. Henry Jerome and Bobby were weekend visitors at the home of their parents Mr. and Mrs. C. Graham.

Don't forget the Garden Party being held at the Hugh Isaac farm in aid of the Christ Church W.A.

SPORTS

We had a bit of a disappointment in Acme Friday night with our farm club. The Acme boys were far too powerful and experienced for our farm club to close the big gap in the score 26—5. But what they lacked in experience they showed in spirit. The crowd had lots of laughs and when these little kids stand in there and the bat is longer than they are tall it is worth seeing, regardless of the score.

4th WIN FOR CARBON PONYS

Carbon Ponys came through with their fourth win in as many games by defeating Acme 6 to 1 in Acme's Monday game.

Carbon remained scoreless until the third inning when McCracken drove a ball deep into left field bringing in two runners and scoring himself.

Morgan went the full seven innings on the mound and worked his curves to perfection, collecting 15 strikeouts (and that's a lot of strikeouts).

Diede was hitting .1000 for the night's performance with a total of three singles and a walk.

Our next game will be in Carbon when we play host to the same club Monday June 10 at 6:30 p.m. This should be a good game. Come out and give the boys your support.

LITTLE LEAGUE BASEBALL

Well folks, the big thing happened. Carbon White Sox went down to defeat to Acme Tuesday 9—7. This was one of the best games seen this season. Both clubs played heads up ball. Davis did some good backing behind third and made some beautiful snags in left field for Acme. Shaky Schacher is still making the crowd stand up and rave with his speed on

second. Yogi Stubbett made some snappy plays at short and a big league steal to home. The whole ball club missed old Chewy Woods to tell the umpire which are balls and strikes behind the bat. Speedy recovery, Chewy, we need you in these close ones.

Bring your friends to the next game June 18th at 6:30 p.m. sharp to see some real ball between Swahwell and Carbon Little Leaguers.

W.M.S. RALLY AT HANNA WED. MAY 22nd

The guest speaker Mrs. Moffat of Calgary gave us a very delightful and informative address.

In part she read two resolutions sent by the W.M.S.: one on no more liquor outlets being allowed in Alberta and the other on the treatment of the Hobbema Indians.

She also pointed out that Alberta collects \$53,000 for missions yet \$57,000 is spent in the Alberta mission fields.

Press Secty., Mrs. E. Barton.

It's your responsibility and duty as a citizen of this country to get out and vote your choice next Monday June 10th

CARD OF THANKS

I wish to thank all my friends for their cards, gifts, flowers and visits while I was a patient in the Three Hills hospital, also the Ladies' Auxiliary 161 for their kindness.

Frank Harris

CARD OF THANKS

We wish to thank all our kind neighbors and friends for their lovely flowers, gifts, cards and visits and kindnesses to our son Grant while he was a patient in the Drumheller hospital; thanks also to Mrs. Muller and his classmates, Dr. Barclay and nurses in the Drumheller hospital.

Mr. and Mrs. R. McIntosh.

SMALL PLUTOCRATS PREFER ECONOMICAL TOYS

An expensive toy is often wasted on the small fry. He would get much more fun out of old kitchen utensils and some sand. They will happily spend hours, pouring sand from one container to another. On a hot day, suitably garbed, they would prefer water to sand, a version of their game that is better played outside. Brightly painted tins are another favorite but care should be taken to use paint that has not a lead base.

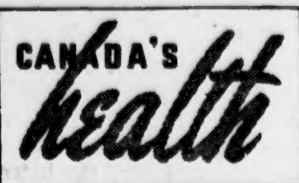

FOR SALE—Weaner Pigs. —Apply Mrs. Dixon, 5 miles east at Sharples.

FOOD POISONING

Food that is prepared well in advance of its use for group meals or picnics should be carefully refrigerated. Food poisoning can occur where moist sandwich fillings, cooked poultry with dressing, creamy pie fillings and similar foods are kept at room temperature for any considerable time, since harmful bacteria forms when the food is not kept sufficiently cool.

VERY PRESENT HELP

Civil Defence is becoming a more and more important subject in most parts of Canada today. It is realized that such an organization is a protection not merely in case of war but

also in the event of natural disasters such as fire, flood, hurricane or earthquake. Men and women, organized and trained to work in any emergency can help their neighbors, families and themselves as well as preventing property damage

TAKING STOCK

Early summer is a good time to take a survey of eating habits. It is wise to check the diet to make sure that necessary proteins, minerals and vitamins are supplied by a variety of foods on the menu. Meat, fish, eggs, cheese and vegetables are necessary to the diet, as well as fruit and milk.

NOTICE

There will be a Forage Demonstration Day at the Ralph Brown farm June 26. Any machine agent interested in demonstrating the use of his machinery may contact either Ralph Brown or Stan Pettem, D.A.

ART BATES — Your Liberal Candidate

Pledges to work increasingly toward:

1. Parity of income for the farmer.
2. Two price sales policy for Canadian Wheat.
3. Further revision of the P.F.A. Act to include more farmers with crop failures adjoining an eligible township.

Art Bates is an active farmer and rancher; a member of the F.U.A.; a delegate to the Alberta Wheat Pool, Vice-President of the Drumheller and District Agricultural Society and is vitally interested in Agriculture.

Art Bates is the only candidate who resides in the Bow River Constituency.

Art Bates, if elected, will unquestionably be on the Government side of the House, where he can assist in formulating Agricultural policies for Western Canada.

with EUTH WYETH SPEARS

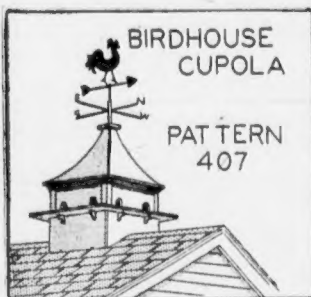

This simple drop-leaf table on one pair of wheels saves many steps between kitchen and outdoor dining area. The wheels may be cut out of solid stock or attractive metal disk wheels with large rubber tires may be preferred. The bottom shelf provides a place for one or more serving trays. The cart and trays are made entirely of stock sizes of lumber. All the

odd shaped parts are made by first tracing the saw lines directly to the wood, including an eight-inch circle for the wooden wheels. The pattern gives a cutting list for the various parts with all detailed directions for assembling and finishing. Price of pattern 443 is 35c.

Weatherwane

A cupola lends distinction to the most ordinary garage. It is not difficult to make one on your work bench and then set it in place. Pattern 407, which shows every

step including a device for shaping the bottom to follow your roof line, will be mailed for 35c. The weatherwane is made with pattern 241 which also is 35c.

WORLD RED CROSS DAY

May 8th was the 129th anniversary of the birth of Henri Dunant, founder of the Red Cross. This date is observed throughout the world as Red Cross Day in honor of the work of Red Cross Volunteers in 75 nations throughout the world. 3247

FIRST CANADIAN FAMILY DOUBLE WEDDING IN GERMANY — The two daughters of WO1 George Norbury, Garrison Workshop, Royal Canadian Electrical and Mechanical Engineers, of Arborfield, Sask., and Saint John, N.B., married two soldiers employed in same camp recently. Standing left, Craftsman James Richard Duncan of Brigidon, Ont., and his bride, Donna Elaine Norbury in front of him; centre is Capt. John P. Gordon of Collingwood, Ont., the Protestant Chaplain who performed the ceremony, and right is, Craftsman George Ward of Charlottetown, P.E.I., and his bride Marilyn Anne Norbury. —National Defence photo.

Another landmark going down here

Another landmark on the Humboldt scene is soon to be missing. The St. Andrew's Anglican Church Parish Hall is now in the process of being demolished and it is expected the building will be completely torn down by the end of June. The Hall was sold some months ago to Sid Hall who is having the building demolished.

Rev. F. A. Creighton told The Journal this week that, while there are no immediate plans for rebuilding, a long-term reconstruction program is being studied by congregation and it is hoped eventually to build a new church which would also contain a parish hall. —The Journal, Humboldt, Sask. — April 18, 1957.

FORCE OF GRAVITY

The force of gravity, which determines how much we weigh, is less the further south we go, until the equator is crossed, then starts up again.

200 Wells at Midale

Still most highly regarded from a point of view of proven reserves Midale oil field has just reached another major point in its development with the completion on April 8 of its 200th oil well.

Listed as the 200th well is the Husky Mic-Mac No. 13-34 located in the northeast corner of the field. It is one of a group of successful outpost ventures that have been drilled in that same area.

The well is located five miles northeast of Shell Oil's original A-7-8 discovery well.

While the Midale field has reached the 200-well mark, the Steelman field where drilling operations were concentrated last fall and winter, now has a total of 256 wells capable of production. It is the largest field in southeastern Saskatchewan at the present time. The Mercury, Estevan, Sask. — April 25, 1957.

The basilica of St. Peter's in Rome covers 3.7 acres.

Jubilee festival has opening at Morden

For the first time in its 25 year history, the Southern Manitoba Music and Speech Arts Festival Competitions held the opening sessions in Morden. Officially opening the 1957 sessions, Mr. C. C. Strachan listed the 25th anniversary as a mark of achievement. The festival is serving a wonderful purpose in helping to develop our young people, she said.

The first day's sessions, held yesterday in the Collegiate Auditorium featured the Morden Instrumental classes. The adjudicator, Filmer Hubble, found the performances to be both "enjoyable and most interesting". Generally speaking he found the standards of playing to be fairly good. —The Times, Morden, Man. — April 24/57.

LATIN QUARTER

The Latin Quarter in Paris derives its name from the fact that all courses at the University of Paris were once taught in Latin.

Jane Ashley Says

"Corn Starch Makes Tastier Entrees!"

CREAMED SALMON

- 2 tablespoons MAZOLA Salad Oil
- ½ medium onion, chopped
- 4 tablespoons BENSON'S or CANADA Corn Starch
- 1 teaspoon salt
- ¼ teaspoon pepper
- ½ teaspoon paprika (optional)
- ½ teaspoon Worcestershire sauce
- 2 cups milk
- ½ cup fish stock
- 2½ cups cooked salmon, cut in large pieces
- ¾ cup cooked peas

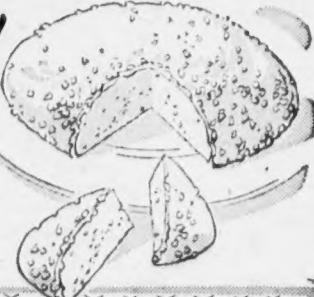

HEAT MAZOLA Salad Oil in saucepan. ADD onion and cook over medium heat until tender but not brown. REMOVE from heat; add BENSON'S or CANADA Corn Starch and seasonings. STIR in milk and fish stock gradually; blend well. COOK over medium heat, stirring constantly, until mixture thickens and comes to a boil. ADD salmon and peas; serve immediately or keep hot. SERVE on toast or in tart shells or in toasted bread cases. YIELD: 6 to 8 servings.

Scrumptious!

Coffee cake at its best... sweet and scrumptious! And so easy to make with Fleischmann's Active Dry Yeast when you bake at home. Surprise your family tomorrow!

Butterscotch coffee cake

1. Measure into bowl ½ cup lukewarm water. Stir in 1 teaspoon granulated sugar. Sprinkle with contents of 1 envelope Fleischmann's Active Dry Yeast. Let stand 10 minutes, THEN stir well.
2. Sift together twice, then into a bowl 2½ cups once-sifted all-purpose flour, ½ cup granulated sugar, 1 teaspoon salt, ½ teaspoon grated nutmeg. Cut in finely ½ cup chilled shortening. Beat until thick and light. 2 eggs and stir into dissolved yeast. Make a well in dry ingredients and add yeast mixture; mix well, adding a little additional flour, if necessary, to form a soft dough.

3. Turn out on lightly-floured board and knead until smooth and elastic. Place in greased bowl. Brush top with melted shortening. Cover. Let rise in warm place, free from draft, until doubled in bulk—about 1½ hours.

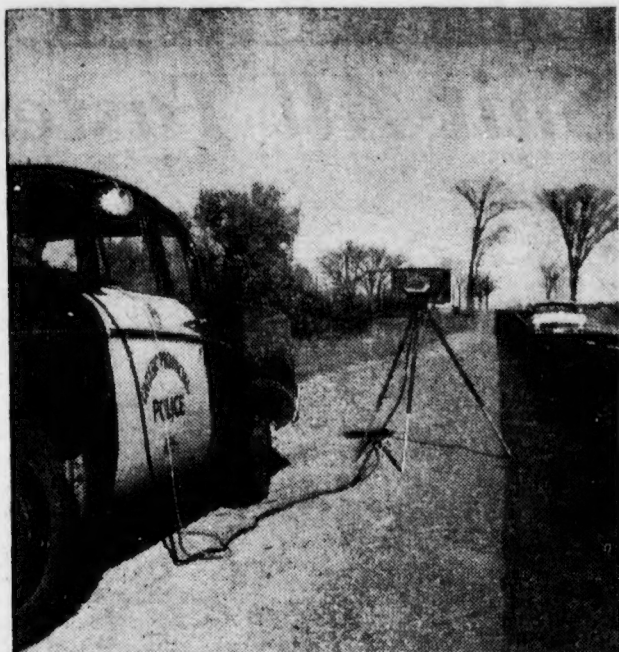

4. Punch down dough. Halve the dough. Roll each half into a 9-inch circle and place on greased cookie sheets. Brush each circle with melted butter or margarine. Cover. Let rise until doubled in bulk—about 50 minutes. Bake in a moderate oven, 350°, about 30 minutes. Cool and spread coffee cakes with the following butterscotch icing:

Measure into a saucepan, ½ cup lightly-packed brown sugar, few grains salt, 3 tablespoons butter or margarine and 4 tablespoons cream; stir over very low heat until sugar dissolves. Remove from heat and work in 1½ cups (about) once-sifted icing sugar—use enough sugar to make an icing of spreading consistency. Stir in ¾ cup coarsely-chopped toasted pecans and ¼ teaspoon vanilla. Yield: 2 coffee cakes.

Needs no refrigeration

Safety Leagues Fight "Fetish to be First"

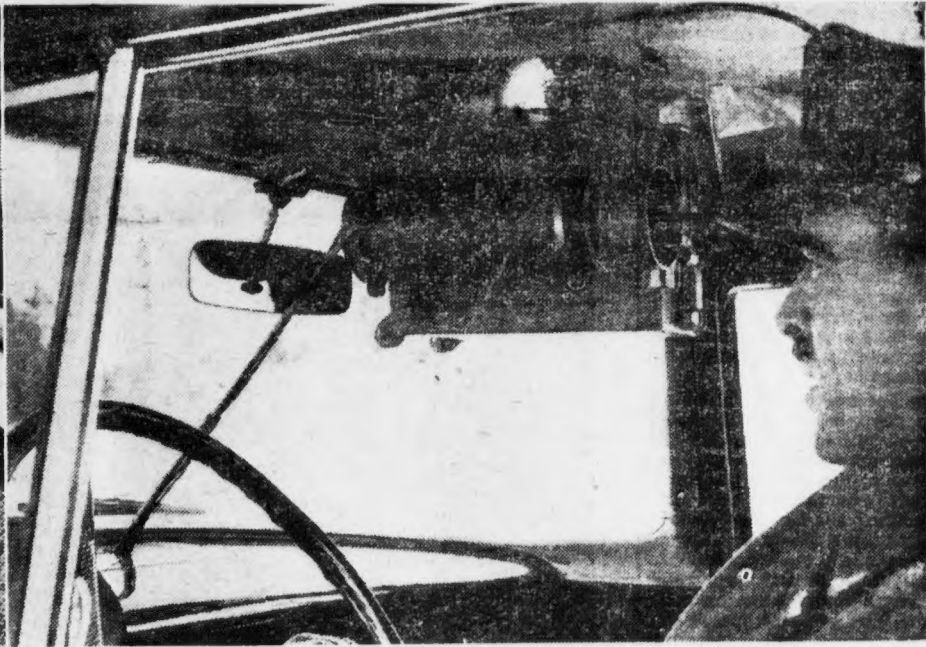

75% of all fatal accidents are caused by speed. The fetish to be first has sent many a driver, whose only need for speed was the fear that someone might get ahead of him, to an early grave. Above, police patrol car, aided by the unblinking eye of radar, checks speed of passing car.

Radar speed meter in patrol car reveals that approaching vehicle is travelling at 68 m.p.h. Officer radioes information to police car up ahead together with description and licence number. It is a bitter fact that most accidents happen under ideal conditions: bright daylight, perfect roads . . . for it is then that the human element, overcome with confidence, plays its deadly role.

Youthful motorists—14% of the drivers—are involved in a disproportionate 26% of the accidents. Safety Leagues across Canada are making a concerted effort to reduce this figure with special courses on safe motoring.

Every 3 hours an accident takes the life of a Canadian motorist—the victim of a race with death in which he came out second best. Above, Quebec Provincial Constable checks speed of car ahead with the aid of a specially equipped camera.

National Film Board of Canada Photos by Irving Dool and Chris Lund.

G. A. Roeher appointed co-ordinator of rehabilitation for disabled persons

The appointment of G. Allen Roeher to the position of Co-ordinator of Rehabilitation for Disabled Persons was announced by Hon. T. J. Bentley, Saskatchewan Minister of Social Welfare and Rehabilitation.

Mr. Roeher has since 1953 been Executive Director of the Saskatchewan Council for Crippled Children and Adults, in Saskatoon. In his new position he will be responsible for the co-ordination of all activities in the province related to the rehabilitation of disabled persons. He will also act in a liaison capacity with the office of the National Co-ordinator of Civilian Rehabilitation of the federal government.

Saskatchewan born, Mr. Roeher received his basic education in the province. He earned his B.A. degree in sociology, and BSW in social work from the University of British Columbia. Mr. Roeher received an M.A. degree in vocational rehabilitation from New York University.

In 1949 Mr. Roeher joined the Division of Research and Statistics of the Saskatchewan Department of Public Health to conduct a study of long-term cases in Saskatchewan hospitals, and implemented some of the recommendations by establishing the first

Medical Social Casework department in a hospital in Saskatchewan, at Moose Jaw. In 1951 he became supervisor of the Physical Restoration Center in Saskatoon.

Mr. Roeher's previous work has brought him into close contact with both voluntary and official agencies concerned with health and welfare problems in the province. He will assume his new duties with the Department of Social Welfare and Rehabilitation at Regina May 13. 3247

Seven out of ten hunters got a deer last season

Once again the Kootenays turned out to be the most favored hunting spot in B.C. according to the report of Game Commission biologist Glen Smith.

About seven out of 10 hunters got at least one deer during the season in both East and West Kootenays.

Grouse and duck harvest was also up for the 12,000 hunters, about 6,000 in each of the two Kootenays.

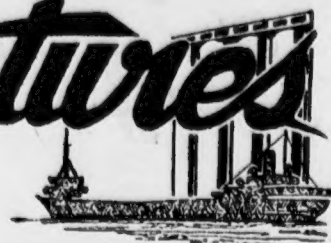

It is hoped to get a more complete breakdown of the hunting harvest for the Boundary soon.—The Gazette, Grand Forks, B.C.

Before every holiday weekend, grim statisticians sit down to compute the number of Canadians who will die on the highway. Safety leagues across Canada, alarmed over the needless slaughter have proposed "3 E's" to combat it: Enforcement—Education—Engineering. Above, a Mountie hands out ticket to a protesting motorist. The RCMP patrols highways in all provinces except Ontario and Quebec.

Canadian Weekly Features

Sold to the breakers

For several weeks now the former Cunard liner Ascania has been lying in a shipbreaker's yard in Newport on the Bristol Channel. Acetylene torches have reduced Ascania's once tall superstructure and graceful hull to a singed and gutted shell and within a few days nothing will remain of the old ship but her records.

Last November, after 33 years' service in good times and bad, the Ascania sailed out of Montreal harbor on her final crossing of the Atlantic. She was fondly known to thousands of Canadian travelers and the men and women who served in her down through the years never forgot her comfortable ways nor her steadiness when the Atlantic was ornery.

As is customary when a Cunard liner completes her final voyage, the Ascania was sold to the breakers who, in turn, auctioned all fittings, furniture and other movables on board. Ship lovers from widely-scattered parts attended the Ascania's last rites and within a few hours of the sale, the old ship's lounges, smoking rooms and restaurants were being cut up by the breakers' torches.

One of the first public rooms to be stripped was the Ascania's Long Gallery, a lounge on the promenade deck. On the mellowed oak panelling in this room was a small plaque that was presented to the Ascania by Lloyd's of London in 1935 for her part in a gallant rescue. This little tablet, perhaps, best expressed the old ship's doughty career and the qualities of the men who served her.

In December, 1934, the tramp steamer Usworth, bound for Queenstown with a cargo of grain, was the last vessel to leave Montreal. In mid-Atlantic, a week after sailing, the Usworth ran into terrific seas which damaged her rudder. Her steering gear failed and three days later heavy seas stove in her hatches and she took a list of 25 degrees.

The Ascania was 100 miles away when she received the Usworth's SOS at midnight, December 13. The Cunarder changed course and steamed at 16 knots to the rescue through mountainous seas. The Ascania reached the Usworth at 8 a.m. and found the Belgian steamer Jean Jadot standing by. The Belgian got a lifeboat away which took off 14 of the Usworth's crew. As the boat got back to the side of the Jean Jadot, it smashed against the ship's side and capsized. Twelve men from the Usworth and two of the lifeboat's crew were drowned.

After seeing the disaster, every officer and seaman in the Ascania volunteered to attempt the rescue of those still aboard the sinking Usworth. One of the Ascania's lifeboats was manned and lowered away. Before the boat reached the stricken ship, however, two of the tramp's seamen and her ship's boy jumped into the sea and were swept away. The captain and eight seamen who had remained on the Usworth waited until the Ascania's boat was almost alongside then jumped overboard and were pulled to safety. The lifeboat returned to the Cunarder and was hoisted aboard with all in her safe. A few moments later the Ascania proceeded on her voyage. As she steamed away, the Usworth slipped beneath the surface of the Atlantic.

Chlorination plans in Kinnaird okayed

Plans for the chlorination equipment for the Kinnaird water system have been approved by Dr. C. MacKenzie, Director of the West Kootenay Health Unit, and have been forwarded to the Provincial Department of Health in Victoria, for checking and final approval. This information was given to the Kinnaird Commissioners by Commissioner F. G. Warner at the regular Monday night meeting in the Village Office. No orders for equipment will be placed until word is received from Victoria.—The News, Castlegar, B.C.—April 1, 1957.

Canadian Sportsmen Always Prepared Fish Baits to Suit All Tastes

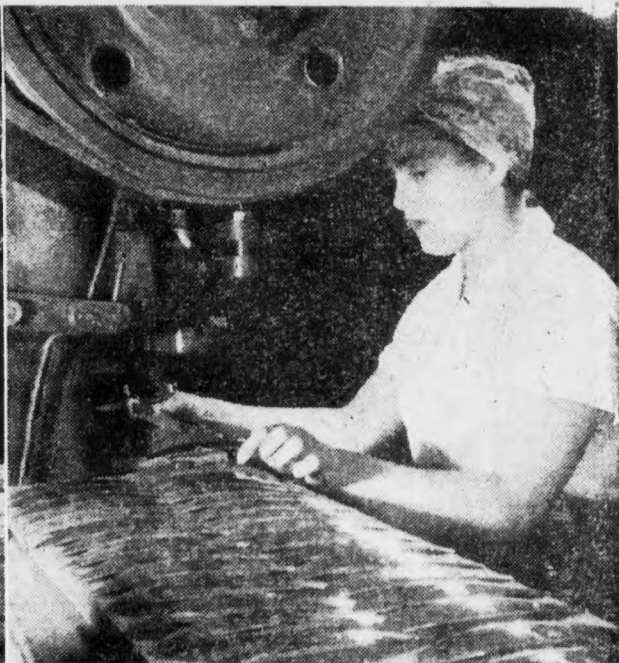

Canada, say rod and reel enthusiasts 'round the globe, is the greatest sport fishing country in the world. Millions of crystal lakes, thousands of silver streams, await the annual exodus from the cities of eager fishermen, armed with gaily-painted lures, who go forth to pit their skill

against the cunning of the fish. Above, an 18-lb. northern pike surrenders to Bill Macdonald and Stephen Greenlees after a lusty struggle in the Pikitigushi River, north of Lake Nipigon.

National Film Board of Canada Photos by Chris Lund.

Some of the more popular baits, which no well-heeled angler would be caught without, are shown above: the red-eyed wiggler, silver darters, and the whirling kidney spoon with feathered triple hook trailing.

A perennial favourite is the wobbling spoon bait. Its wounded minnow action has tricked many a champion muskie, pike, walleye, bass and trout onto the hook of some delighted sportsman.

Above, fish scale design is sprayed onto plug bait to simulate a perch finish. Plugs in background resemble shiners, chubs, smelts and suckers—forage fish sought after by the game species for food.

New designs for bait are constantly being thought out, tested, discarded or approved. Above, Frank Edgar and his son Bill discuss a new plug which their Peterborough, Ontario, firm will turn out for this year's fishing season.

MERGER OF LARGE CO-OPERATIVES IN OFFING

An announcement regarding the merger of two of Alberta's large farmer co-operatives has been made. The boards of directors of the Alberta Wheat Pool and the Alberta Seed Growers' Co-operative have reached agreement on a proposal by which the Wheat Pool would take over responsibilities and properties of the Seed Growers' association. This was made known in a statement issued jointly by the two organizations.

A special meeting of the Alberta Wheat Pool delegates is to be held in Calgary on June 12 at which time the proposal will be presented to them for final ratification.

Details of the transaction and the date of transfer have not been announced. These will be made public as soon as final arrangements have been made. It is expected the Alberta Wheat Pool will be able to take over operation of the seed business in time to handle the coming crop.

The Alberta Wheat Pool is a large grain marketing co-operative with a membership of nearly 50,000 and with over 535 country elevators located throughout Alberta. The Alberta Seed Growers' Co-operative has a membership in the neighborhood of 12,000 and seed cleaning or storage facilities situated at over 30 points in the province.

LETTERS to the EDITOR

In the May 22, 1957 issue of the Rocky View News, Mr. Woolliams, the Conservative candidate for Bow River, says that I, Charles E. Johnston, Social Credit candidate for Bow River "still insists that our party, Progressive Conservatives, voted against parity of prices in the House of Commons. This is absolutely wrong.

Let us just see whether this is wrong or not. I will let you be the judge as to who, Mr. Woolliams says, "is telling half truths".

On Jan. 23, 1957 page 582 of the official Hansard record of the House of Commons an amendment was made to the Liberal government's Address in Reply to the Speech from the Throne. Here is the full amendment as recorded in Hansard—that the motion be amended by adding the following words to the said address:

"We regret, however, that Your Excellency's advisors seem to favor a flexible price support program. The effect of which is to leave the agricultural industry in a state of uncertainty and insecurity; we also regret that Your Excellency's advisors have failed to take the necessary steps to establish a system of parity prices for agricultural prices at levels to ensure 100 per cent parity of income for agricultural producers."

Mr. Woolliams said in his letter that the amendment changed the wording of the main motion. You will notice however, that the wording of the

motion was never changed. The amendment merely added some words to the motion. All this amendment did was to ask that the policy of the Liberal government be such as to give the farmers of Western Canada their fair share of the national income, or in other words 100 per cent parity of income. This is exactly what all the farmers' organizations asked for in the briefs which they presented to the Liberal government during this past session of Parliament. This amendment was carefully worded in simple language so that even Mr. Woolliams should have been able to understand

it. Yet the first man of the Conservative party to stand up in his place in the House of Commons and vote against parity of income for the farmers of Western Canada was none other than John Diefenbaker, the present leader of the Conservative party. This vote is recorded on page 584 of Jan. 23, 1957 Hansard. Remember that it's votes that count, not idle words.

Not only have they, the Conservatives, voted against the very thing that all farm organizations and the farmers themselves are asking for, but they voted confidence in the Liberal government. This amendment

was an amendment to the Speech from the Throne which is a statement of the Liberal government's policy which failed to provide parity of income for the farmers of Western Canada. So you see the Progressive Conservatives supported, by their vote, the Liberal government's farm policy. Now lo and behold they, the P.C's, are now fighting the Liberals in this election after having supported them in the House of Commons. Surely this is the rankest of inconsistency—but after all there is no difference between Liberal and Conservative policy. Therefore if the farmers of Western Canada

want a farm policy which will give them their fair share of the national income, that is 100% parity of income, they must vote Social Credit.

Mr. Woolliams has already been on the public platform with the Liberal candidate and myself on four different occasions and has never disproved the fact that the Conservatives voted against the amendment on page 582 on Hansard which asked for parity of income for the Western farmer.

Yours for a square deal for agriculture.

Charles E. Johnston,
Social Credit candidate
for Bow River.

The skin-diver is saving regularly to buy a new boat

The man next door is saving to enlarge his summer cottage

Both have a bank account - and a purpose for saving

You probably have your own equally good reasons for saving. There are thousands.

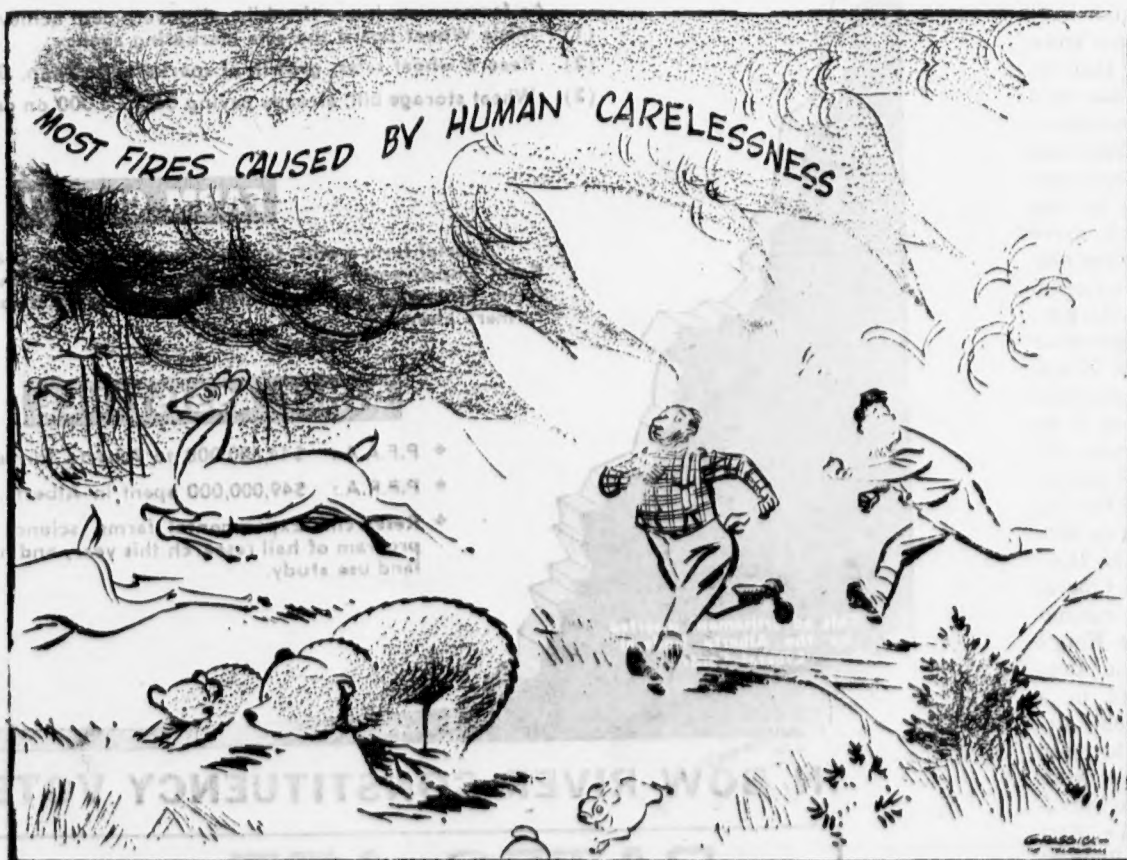

One way to be sure you will have the money you want when you want it is to make regular deposits in your bank account.

It takes will-power. Sometimes it means doing without things you are tempted to buy.

But as you advance steadily toward your chosen objective, you know the satisfying feeling that comes with getting ahead financially. You realize that you are creating a reserve of ready cash that can be a gateway to future opportunity, or serve as a bulwark in time of need. You can always count on a bank account.

Save at a bank — millions do!

THE CHARTERED BANKS SERVING YOUR COMMUNITY

"WONDER WHY THEY CALL HIM HOMO SAPIENS?"

LETTERS to the EDITOR

As we approach the deadline for voting it might be a good idea for the people of Bow River to review all that has been said in the election campaign by the different candidates. When I hear all the condemnation of the Liberal Government and the absurd election promises I wonder if these men really mean what they say. At the beginning of the campaign an editorial in McLeans Magazine mentioned that the promises of reduced taxes and increased spending would begin, yet Mr. Hinman of the Alberta Government has said that increased spending "obviously must come from taxes". Are our people going to be lured by the age old election promises that mean nothing

There is also that gag of regaining our lost markets. Surely Mr. Johnston and Mr. Woolliams know that in the last five years our exports of wheat have been the highest for any five year period in the history of Canada and last year we exported more wheat than any previous year. Are we to condemn the Liberal Government because nature has been so good to us? I suppose they will next condemn the Liberal Government if we have a series of dry years. I believe the Wheat Board has done a magnificent job. Yes they claim we have lost our markets, yet since the last war Canada has been the third highest trading nation in the world the most of the time. Think of that, a nation with a population of sixteen million only being exceeded in trade by the U.S.A. and Great Britain. Does that look as if we have lost our markets?

Mr. Johnston keeps talking of a National Coal Policy. Is he so ignorant that he doesn't know of the millions of dollars spent in subventions on coal that have kept the majority of miners of Alberta working and without which only a small amount of coal would have been mined. Does he not know that in the same time that the Federal Government has paid out millions in subventions, the Provincial Government has received millions in royalties, yet has done nothing to help the miners except to move them to other districts and other jobs when mines are closed.

Mr. Woolliams keeps harping on the fact that a Conservative Government started the Wheat Board. Why this is important now I don't know, but if he wants to know the truth, the first Wheat Board was started during the first World War by the Union Government its Minister of Agriculture, the Hon. T. G. Crearer, now a Liberal senator and former cabinet minister in Mackenzie King's government. Later the Bennett Government put in a Wheat Board under John McFarland, a Liberal. The only reason it wasn't in the form it is today is because Conservative members in the East would not support Mr. Bennett in putting it in its present form. This is all water under

the bridge and doesn't amount to anything. It has as much bearing on the present as the Pacific Scandal. Perhaps Mr. Woolliams should tell you about that. The fact is the Wheat Board, as it is today, was put in by a Liberal Govt.

As we listen to the cascade of words and dearth of ideas going around we should give serious consideration to what has been done. Mr. Diefenbaker claims it was a black Friday when the Liberals put in closure. I claim it was a black Friday too, not because of the closure but because a small group of men in two parties were going to thwart the will of the people and prevent Ontario from getting gas by wasting time in Parliament and talking in technicalities instead of debating the subject. Yes it was black Friday—the Conservat-

ives should hang their heads in shame to think that they would oppose this legislation when their best authority on the subject, Carl Nickle, M.P. broke with his party to help get the bill passed.

Canada is one of the greatest nations in the world. No other country in the world is more respected than Canada. When you go to the polls on June 10th, vote for the party that has done so much to put Canada in this position and vote for the man, Art Bates, who can do more for Bow River than any other candidate.

Yours truly,
W. D. MacDonald.

SAFE SWIMMING

This year, for the first time, a National Water Safety Week will be observed throughout Canada during the week of

June 16 to June 22. With your support and co-operation it is the hope of the Canadian Red Cross Society that this project will help decrease Canada's dreadful drowning toll. This lists a few facts to ensure safe swimming:

DON'T swim alone.

DON'T swim at unsupervised swimming places.

DON'T dive into unknown water. Rocks and branches may be hidden.

DON'T swim after eating. Wait at least 2 hours.

DON'T swim when overheated. Cool off gradually first.

DON'T swim when overtired

DON'T swim too far from shore. Swim parallel to the shore.

DON'T swim until you become exhausted, particularly if the water be cold.

DON'T swim after dark unless thoroughly familiar with the swimming area, know it to be safe, and are accompanied by a "buddy". STAY CLOSE TO SHORE.

DON'T panic if you should get into difficulties. You must think clearly if you are to do the right thing.

DON'T "duck" or push bathers into water. PLAYFULNESS MAY COST A LIFE.

ALMOST PERFECT

Milk is our most nearly-perfect food and is important in the diet of young and old. In any form, liquid, evaporated or powdered, whole or skimmed, it can be used as a drink or a food ingredient. Cooking does not destroy the nutrients of milk.

Get out and vote your choice on Monday June 10th.

WHY ALBERTA FARMERS ARE VOTING LIBERAL

FARM REPRESENTATION

We farmers need more members on the government side of the Commons supporting our interests. At present there is not one practising Alberta farmer at Ottawa!

PRICE SUPPORTS

Liberal price supports on hogs, eggs, butter extended to poultry this year.

WHEAT MARKETS

As farmers we know the Liberal government achievements:

- (1) Made Wheat Board the sole marketing agency.
- (2) Record wheat sales, growth of markets in Japan, Germany etc.
- (3) Wheat storage bill, already paying \$60,500,000 on carryover.

FARM CREDIT

Special farm credit, sources: Canadian Farm Loan Board, Farm Improvement Loan Act, Prairie Grain Producers Interim Financing Act, amounting to \$199,200,000 to Alberta farmers alone.

OTHER ASSISTANCE

- ♦ P.F.A.A.: \$44,800,000 to Alberta farmers.
- ♦ P.F.R.A.: \$49,000,000 spent in Alberta.
- ♦ Research: Experimental farms, science labs, new program of hail research this year, and nation-wide land use study.

This advertisement inserted by the Alberta Federal Liberal Centre.

IN BOW RIVER CONSTITUENCY VOTE FOR

BATES, ART

X

Twice pretty!

4620
SIZES
14-48

by Anne Adams

Sew TWO pretty versions of this graceful dress! Choose the low-neckline for summer; the high neckline with sleeves for cooler weather wear. Sewing is so very easy; the simple, smart style so becoming to every figure—whether you're a size 14 or a size 48.

Pattern 4620: Misses' Sizes 14, 16, 18, 20; 40, 42, 44, 46, 48. Size 18 requires 3 3/4 yards 35-inch.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send forty cents (40c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,
Department P.P.L.,
60 Front Street, W., Toronto

Be sure to write plainly your Name, Address, and Pattern Number.

Pinafore of huck!

7126

by Alice Brooks

Just right for hot summer days ahead—a cool, pretty pinafore made of huck, in white or color! Easy huck weaving, a gay touch!

Pattern 7126: Children's Sizes 2, 4, 6, 8 included. Pattern, directions for huck pinafore; easy-to-follow chart for huck weaving.

To obtain this pattern send thirty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,
Department P.P.L.,
60 Front Street, W., Toronto

Two FREE patterns—printed in our ALICE BROOKS Needlecraft book—stunning designs for yourself, for your home—just for you, our readers! Dozens of other designs to order—all easy, fascinating hand-work! Send 25 cents for your copy of this wonderful book right away!

"Ah, Mr. Smith, I am going to raise your rent."

"Excellent. I can't possibly raise it myself."

When shall correspondence be confidential?

(The Mercury, Estevan, Sask.)

The recent minor tilt between Premier St. Laurent and Conservative party leader Mr. Diefenbaker in parliament at Ottawa, over some correspondence the former was presumed to have had with President Eisenhower, brings up the question as to what constitutes confidential communications in the realm of government.

Mr. Diefenbaker asked the Premier about a press report to the effect that the latter had sent a letter to the president of the United States protesting against the latter's farm surplus disposal program. The former maintained that even if the protest was "confidential" the House of Commons had a right to know whether or not it had actually been sent.

Mr. St. Laurent refused to deny or confirm the press report that had sent such a letter saying that "to state whether such a letter had been written would make the system of confidential interviews and confidential correspondence lose practically its whole value."

In basic theory there is probably not too much difference between the routine of business communications passing from one individual to the other and communications in connection with the business of a country at government level, other than the latter is the realm of public interest.

Or to bring it to a situation closer to home and one that can be more easily appreciated and understood, the work of local councils can be used as an example.

One of the latter, let it be said, might be entering into negotiations with an individual over some matter; or with another council; or with a provincial government department.

Would anyone say that it was good business or tactful procedure to accede to an opposition demand that in the public interest all correspondence to date and before the negotiations were completed, should be made public?

Such action might well destroy the whole negotiation which otherwise would have reached a satisfactory conclusion.

In these days when actions and utterances of public men are pounced upon and publicized, often to dimensions far beyond what they merit, it would seem fit and proper, that they be given the right to correspond and confer in confidence up to the point, at least, when some decision has been made between them.

That Mr. St. Laurent wrote to Mr. Eisenhower (which he no doubt did), in confidence, as one individual to another, is about as simple and as effective a way to reach a common understanding on any matter as there is. Certainly more so than if Mr. St. Laurent on writing, immediately read the letter in the House. Everyone knows what would happen then—pressure groups in legislative circles in both countries would have immediately found reasons to get into action.

We know that the US farm surplus situation is something of great interest in the welfare of the Canadian farmer but we fail to see how any harm can come to anyone from withholding the contents of a letter between two principals even if it carried a protest.

The main point involved, we would say, is the fact that Mr. St. Laurent is apparently trying to present a case to Mr. Eisenhower in regard to the US farm surplus disposal program. That he be successful in his approach is of more importance than assurance he may have sent a letter or what he may have said in such letter.

Anyway sending a letter to Mr. Eisenhower was a much less costly method than going to Washington for a personal interview, though of course there would be no carbon copy of the latter.

Professionalism in curling

(The Recorder, Reston, Man.)

A small item in the daily papers last week announced that Don Campbell, of Avonlea, Sask., a member of the famed curling Campbell family, had become Canada's first professional curler, signing with the Granite Club in Toronto.

To many, it is a disappointment that professionalism has entered the curling game, the last stand of amateur sportsmanship.

We doubt, however, that there will be many professional curlers, as it is not the type of sport that lends itself to professionalism. Certainly the prize money offered at bonspiels, with the exception of car 'spiels, which have practically disappeared, is nothing to attract a professional.

The Granite Club, no doubt, hired Mr. Campbell to instruct new curlers, and possibly the older curlers, in the correct method of delivering a rock, and the strategy in skipping the end. This is a role filled in many clubs by the senior curlers.

Only a wealthy club could afford such a luxury, and there are not many such clubs in Canada, when the game is played by the common man entirely for fun, and the clubs are operated only with the idea of breaking even on the season's operations.

Last budget was much better

(The Press, Acton, Ont., March 21, 1957)

Well we've had another budget the past week. In spite of all its criticisms it did not levy any new taxes and it did provide additional assistance to many who have no other means of getting it in these days of ever rising living costs. Finance Minister Harris cannot be accused of presenting an election favored budget that might have had real significance to all of us who continually desire lower tax levies from every source.

It was an odd turn of events that found Premier Frost calling the surplus that the Federal government reported "a disgrace." This from a leader whose government until this year had consistently reported surpluses each year. Perhaps with the new Ontario levies the premier of the province may next year, be able to go into disgrace again and present a surplus budget. Most folks like surpluses, especially if they have the opportunity to share in them.

Clearly Mr. Harris' budget was one to help those whose meagre funds will not allow them to create any more inflation. It was encouraging to note that not only pensioners are to be assisted but encouragement was given to those self-employed persons who can now make a tax deduction from income on retirement savings plans. To the many who were brought up when it was customary to provide for your own rainy days this is the first light in a long time.

Tax reductions amount to \$55,000,000 and benefit payment increases in 1957-58 amount to \$93,000,000. To whatever extent you share in these amounts \$198,000,000 is a nice sizeable amount to have a share in and a step in the right direction—and this without any tax increases from Federal tax sources next year.

Yet to come in the budget year is the municipal levy. Then you spend the balance of the year meeting the payments.

Must grow with the times

(The Canadian, Camrose, Alta.)

The City of Camrose is indebted to Jim Dabbs for his determination towards artificial ice in the curling rink. Camrose now has a very modern curling establishment with as good and sometimes better facilities than can be found in many city rinks. Visiting curlers are glad to come here and each winter several groups make this their headquarters for bonspiels, and the ice is rented almost continually. The concession facilities are quite adequate and the surroundings pleasant. Opposite to this Camrose has an ice skating arena that is at the mercy of the weatherman and nearly every time some special hockey match is billed or some carnival is planned, the weather turns warm and the affair is ruined. Many communities smaller than Camrose have taken things in hand and installed ice making machines. It can be done here . . . and Camrose will be looked upon as a second rate sports centre until such time as artificial ice is installed. No good hockey circuit wants Camrose until such time as there is a guarantee of an ice surface in the local arena. Here is something that the City Council could well get busy on before the weather turns cold next fall.

Once a gamble

(The Sun, Swift Current, Sask.)

As industrialization infiltrates the prairies and brings with it rising costs and a decreasing labor source, it faces the farmer with the problem of producing more with less help. He'll have to if he is to hold his place in the country's changing economy.

He'll have to make other changes too: farms will have to be larger to insure the most profitable use of machinery to replace labor. Specialization in production will have to be more rigidly practised. And there must be stronger application of capital to agricultural operation.

Farming was once a gamble. Today it is a profession. Tomorrow it will be a science. The farmer who realizes this and prepares himself for it, will have more security than he has now.

Holy smoke

(The Herald & East Central News, Hanna, Alta.)

Whether or not Canadians are killing themselves with cigarettes, they are contributing much to the nation's coffers. That estimable publication the Financial Post has been doing some investigating into the cigarette industry and has come up with some astounding figures.

During 1956, says the Post, Canadians smoked (heavier types may have beaten them) 27 billion cigarettes. For this privilege, smokers, estimated at 50 percent of the adult population, paid \$565 million. Of that over \$300 million went into federal and provincial taxes. No wonder the tobacco growers are yelling "holy smoke," and the government's saying "light up another!"

Canadian statistics report

(A Weekly Review)

Prices: The consumer price index rose 0.3 percent during March to reach a new peak of 120.9 at April 1, making a twelve-month rise of 3.7 percent. Three of the sub-indexes—food, clothing and other commodities and services—moved up in the month to raise the overall index; shelter was unchanged and household operation fractionally lower. . . . In contrast, the index number of industrial material prices at wholesale declined 0.4 percent in the four weeks from March 29 to April 26. Farm product prices at terminal markets during this period, however, moved upward, with gains for both animal and field products.

Transportation: Railway carloadings dropped sharply in the week ending April 21 to leave the cumulative total over 7 percent below last year at 1,114,448 cars. . . . A new Bureau monthly report shows the volume of freight carried by foreign and coastwise shipping services in January amounted to 3,557,689 tons, 2,403,865 tons being shipped in foreign service. . . . Passenger numbers on inter-city and rural bus lines fell off again in February, but revenue improved.

Mining: Iron ore shipments in the first quarter were smaller this year than last, but the build-up of stocks exceeded this decline. . . . Domestic coal production in the quarter was down 14 percent and landed imports nearly 20 percent. . . . Output of crude petroleum continued upward in January with an increase of over 24 percent.

Manufacturing: March shipments by manufacturers had an estimated value of \$1,807,417,000, which is 2.6 percent higher than a year earlier but under the gain of 5 percent for the quarter. Total inventory at the month's end was over 11 percent above last year and unfilled orders nearly 4 percent higher. . . . Motor vehicle shipments to the end of March were over 26,000 units larger than last year, most of the gain being in passenger cars. April output, however, was down nearly 10,000 units. . . . Pig iron production was up 11 percent to the end of April, and steel ingots some 5 percent.

Households: Canada's ten provinces had 523,647 or 15.3 percent more households in June, 1956, than 1951, a slightly larger increase than the population rise. Numbers were larger in all provinces, Ontario leading in percentage as well as numerical gain.

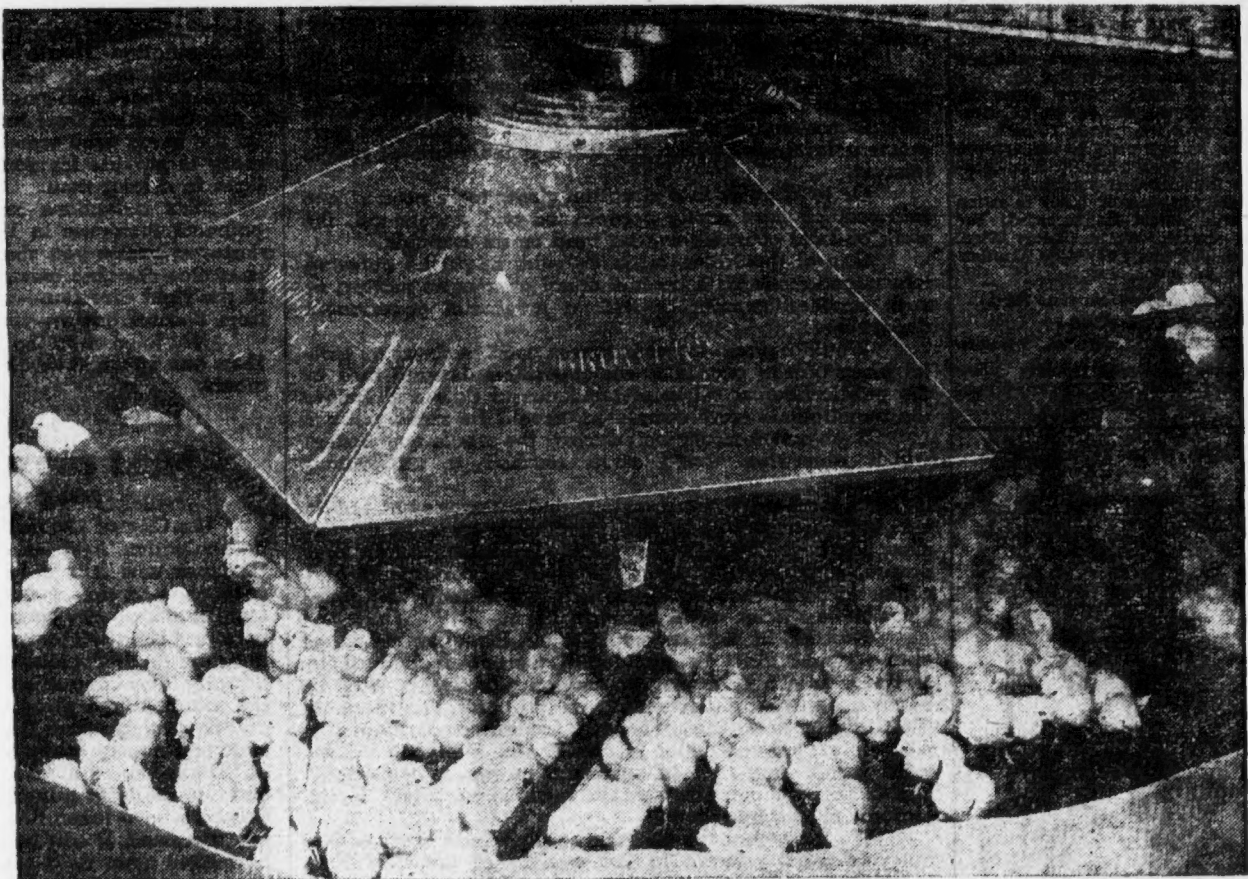

Housing: New dwelling units started in the first quarter this year totalled an estimated 7,769, just slightly more than half as numerous as last year, while the number completed was about 1,000 fewer at 24,637. . . . Building permits issued in February totalled \$78,968,000, residential accounting for \$34,521,000 against \$44,447,000 non-residential.

3247

Not all fishermen favour the heavily-stocked tacklebox. There are those who still adhere to the "can of worms" technique. It's a matter of taste, they say. . . . and sometimes, results. Many a father has blushed with mortifi-

cation, returning empty-handed from the weekend expedition, to find that his 8-year old son, equipped only with willow pole, a hook, and a lowly worm has the evening meal swimming placidly in the bathtub.

CHICKS UNDER THE BROODER, from an entry by a private poultry breeder in the Central Production Test, at Ottawa. This test, conducted by the Canada Department of Agriculture's Production Service, is an extension of the Record of Performance policy for poultry. Twenty-nine private breeders across Canada and one entry from the Central Experimental Farm, Ottawa, were represented in the first Central Test, completed in 1956. Chicks hatched from random samples of eggs collected from private breeders are now being reared for the second Production Test at the Ottawa Test Station.

Spring Cues Closet Cleanup

BY EDNA MILES

AS most cleaning is done these days, there's no longer a set housecleaning spree known as spring cleaning. But somehow, spring does seem the ideal time of year to turn out the closets.

Perhaps it's because so much has accumulated in them during the winter months. First step is to get rid of the useless things that always collect in closets. The next is to remove everything so that shelves, walls and floors can be scrubbed.

An efficient cleaner for walls and woodwork can be made by adding a cup of ammonia, one-half cup vinegar and one-fourth cup baking soda to one gallon of water. If you like, use a little household bleach to dispel musty odors.

When you put away winter clothes, always label the boxes and clothes bags so they can be identified at a glance. And in moth-proofing winter woollens, check the directions carefully before you start.

When everything is shipshape again, keep a bottled wick deodorant on the closet shelf to maintain the fresh, clean smell.

Cleaning materials handy, this housekeeper readies her closets for spring.

CANADIAN PACIFIC'S new 25,500-ton liner Empress of England, sailed on her maiden voyage from Liverpool to Montreal on April 13. Picture shows a section of the Tourist Lounge aboard the Empress of England with a large mural panel depicting Hampton Court Palace and two of the Queen's Beasts.

Quebec Natural Gas Financing

(Contributed by Houston, Willoughby & Co. Ltd.)

As indicated previously, financing for Quebec Natural Gas Corporation was around the corner. These securities have now been disposed of to Quebec residents in the main, and consisted of \$20 million 5 1/4% subordinated debentures and \$8 million (800,000 shares) of common stock. The debenture-stock units were offered at a price of \$140 for each \$100 of debentures plus 4 common shares. In respect to the common shares, two shares can be detached and sold no earlier than May 20th, and not later than July 16th, 1957. The remaining two shares can be detached and sold no earlier than October 1st, 1958, and no later than January 1st, 1960. Following the offering, the debentures and common stock units went as high as \$174-\$178. In addition to the Units of debentures and common shares, \$20 million of first mortgage bonds due 1980 were sold, divided \$12,550,000 of 6% bonds in Canada and the balance of \$7,450,000 5 1/2% bonds in the United States.

The prospectus shows that the company is to acquire the gas production and distribution facilities of Hydro-Quebec for approximately \$39,100,000 subject to certain adjustments and contingent liabilities. It is estimated it will cost \$14,500,000 for conversion of the present gas system of Hydro-Quebec to the distribution of natural gas. Supplies of gas will be originally secured from Tennessee Gas Transmission Co. by way of Niagara and Toronto but by the close of 1958 it is anticipated that gas will be drawn from the Trans-

Canada Pipelines System which should be finished from Alberta by that time.

City of Montreal

The Executive Committee of the City of Montreal needs to borrow \$18 million. It is intended to examine an approach to market with an issue as soon as possible. Proceeds from the borrowing will be applied to the re-payment of temporary borrowing for a varied list of public works, which have been completed and paid for in recent months.

Great Lakes Power Corporation

A new issue of \$5 million of Great Lakes Power Corporation 5 3/4% debentures carrying share purchase warrants was announced the middle of the present week. These debentures are to mature May 15th, 1977, and are priced at \$100 to yield 5.75%.

Each \$1,000 debenture will carry share purchase warrants permitting the purchase of 15 common shares of the company up to May 15th, 1959, at \$23 per share. From May 16th, 1959, 1961 the warrant will permit the purchase of 15 common shares at \$25 and this rises each 2 years between 1961 and 1967 and at an increasing rate of \$2.00 with each price change.

As the common stock has been ranging around \$22-\$22 1/2, these warrants would appear to carry some attractive possibilities. Great Lakes Power Corporation Ltd. produces hydro-electric power which is sold to the Great Lakes Power Co. Ltd. for distribution in the City of Sault Ste. Marie, Ont., and surrounding territory. The Corporation has 6 Hydro-Electric Generating Stations inter-connected by over 193 miles of Transmission Lines with a total installed capacity of 173,000 h.p. The present borrowings will allow the company to complete a 7th Station with a further installed capacity of 28,000 h.p. Construction of a 4th Dam and Power Plant with Transmission facilities is planned for 1959. This will boost installed capacity a further 25,000 h.p.

Cheaper Money?

U.S. Treasury Bills: On Tuesday the result of the United States Government Weekly Treasury Bill auction was announced at an average of 3.054%. This compared with the previous week figure of 3.194%. While it will take some time to see whether this is a reversal of the trend, it at least is an interesting possibility that is presented. Meanwhile in Canada, it has been rather noteworthy that Dominion Government mid-term issues have been somewhat weaker, selling off from 1/4 to 1/2 of 1% in a number of the maturities between the Victory Loan 3's of 1960 down to the Victory Loan 3's of 1966. Also that 2 3/4% Government of Canada issue due June 15th, 1967-68 was quoted on the 24th instant at \$85 1/4 bid \$86 1/4 asked as compared with \$86 3/4 bid and \$87 asked recently.

It seems more than possible that some large investors holding Dominion of Canada bonds are willing to take a book loss represented by selling at these levels in order to buy long term new Corporation issues which probably have some type of warrant or bonus of common shares attached plus high coupon rates which make them particularly attractive at this time.

Forthcoming issues

The rumour is that Canadian Dyno Uraniums may place an issue of \$9 1/2 million 6% bonds due May 1st, 1963, each \$1,000 bond carrying 60 shares of common stock as a bonus and to be priced at \$99 and interest.

Newspaper reports also mention \$6 million of Nova Scotia Light and Power 1st Mortgage 5 1/2% bonds due 1977 as well as \$2 million of the Hamilton Cotton Co. 6% 1st Mortgage Bonds due 1972.

SASK. ROUGHRIDERS PLACEMENT BOOSTER DELUXE

REG WHITEHOUSE

It was Saskatchewan's gain and Montreal's loss when Reg Whitehouse joined the Riders six years ago. Only 24 years old, Reg enjoyed his biggest season last year when he was named the most valuable Canadian player on the Rider roster and was picked by fans to play in the annual East-West Shrine all-star game. An excellent running guard and a top-notch defensive lineman as well, Reg earned most of his plaudits in 1956 with his educated toe. Reg finished fourth in the Western Conference scoring race last year and he was the leading point-getter among homebrew players in the league. Now making his home in Regina, Reg is a six-footer weighing 210 pounds.

KIDS FOOTBALL CONTEST?

Last year 900 Boys received one Regulation Size Football, value approximately \$7.00.

This year the Booster Club will give away 2,000 Footballs or Helmets or Shoulder Harness.

Girls, we will have something special for you.

MAIL THIS COUPON TODAY

Mr. Gust Moll, operator of the Maidstone Ferry, reported seeing 12 whooping cranes flying low over the river, shortly after noon today. The Mirror, Maidstone, Sask.—May 2, 1957.

RED CROSS WATER SAFETY

SAFETY SAM SAYS:

IN A CANOE OR BOAT IS NO PLACE TO "SHOW OFF"

...CLOWNING CAN....AND OFTEN DOES, END IN TRAGEDY!

COURTESY OF CANADIAN RED CROSS (SASK. DIVISION)

Safety Lane dates announced

Dates for the 1957 Safety Lane schedule were announced by J. A. Christie, chairman of the provincial highway traffic board.

Dates are as follows: North Battleford area May 4, 6, 7, 8; Saskatoon area May 10, 11, 13, 14; Prince Albert area May 22, 23, 24, 25; Melfort, May 28; Nipawin, May 29; Porcupine Plain, May 30; Langenburg, June 4; Yorkton, June 5, 6, 7, 8; Melville, June 11, 12; Fort Qu'Appelle, June 13; Cupar, June 14; Strasbourg, June 15; Nokomis, June 17; Watrous, June 18; Bruno, June 19; Humboldt, June 20, 21; Wynyard, June 22; Wolseley, June 25; Whitewood, June 26; Moosomin, June 27; Kipling, June 29; Carnduff, July 3; Oxbow, July 4; Estevan area, July 5; Weyburn area, July 11, 12, 13; Gravelbourg, July 16; Shaunavon, July 18, 19; Cabri, July 25; Kerrobert, August 1; Unity, August 3; Swift Current area, August 15, 16, 17; Moose Jaw area, August 21, 22, 23; Regina area, August 24, 26, 27, 28, 29; Davidson, August 31; Lloydminster, September 7.

Mrs. Christie urged every Saskatchewan motorist to participate in the Safety Lane check up.

"Five trained men will operate the safety lane to check cars free of charge. They will tell exactly what is wrong with cars from a safety standpoint. Please remember that although highway safety depends largely on the driver, the safest driver is dangerous if his automobile is not safe," Mrs. Christie said.

Lawful to use four headlights

Saskatchewan motorists may use four headlights on their automobiles as a result of an amendment to a section of the Vehicles Act, J. A. Christie, chairman of the Highway Traffic Board, has announced.

The amendment was recommended by the board in view of the fact that manufacturers are now selling new automobiles equipped with four headlights.

"Many people," he said "are still unaware of the fact that is now legal to use four headlights in the province and numerous inquiries have been pouring into the Highway Traffic Board office."

"Another amendment to the Vehicles Act is the 'dimming distance' amendment," he said.

The distance for dimming headlights when approaching an oncoming vehicle has been reduced from 1,500 feet to 500 feet to eliminate an unnecessary distance the motorist had to travel without seeing the road clearly. — The Bruno Times, Humboldt, Sask., April 19, 1957.

(The Mercury, Estevan, Sask.—April 25, 1957)

DITTO PLATES—Douglas G. Walker of Estevan took a second look last week when he received his new, 1957 license plates at the issuing bureau at Estevan Court House. He found that he had been issued with the same license number this year as he had been issued with last year. "There was nothing planned about," he said, "I just went to the Court House, filled out the handful of forms, paid my fees, got my license plates, and there they were with the same number, 69939, as I had last year."

Patterns

Half-size fashion

4659 SIZES 14 1/2-24 1/2
PRINTED PATTERN

PRINTED directions on each pattern part! Takes so little time to make this figure-flattering dress! Simple, slimming lines are perfectly proportioned for the half-sizer; no alterations problems—easiest sewing ever!

Printed Pattern 4659: Half Sizes 14 1/2, 16 1/2, 18 1/2, 20 1/2, 22 1/2, 24 1/2. Size 16 1/2 takes 3 3/4 yards 35-inch.

Printed directions on each pattern part. Easier, faster, accurate.

Send forty cents (40c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,
Department P.P.L.,
60 Front Street, W., Toronto

Be sure to write plainly your Name, Address, and Pattern Number.

CAN BE PREVENTED

Medical science has few achievements more to its credit than the conquest of polio—a disease which has caused untold suffering and many deaths. Polio now moves into the class that contains smallpox, typhoid fever and diphtheria—diseases that, though serious, can be prevented.

—Lachute (Quebec) Watchman

Grain prices for 1957

The Government has approved initial prices to be paid by the Canadian Wheat Board on the basic grades of wheat, oats and barley for the crop year beginning August 1, 1957. These initial prices are as follows:

Wheat—\$1.40 per bushel No. 1 Manitoba Northern, in store Fort William/Port Arthur or Vancouver.

Oats—60 cents per bushel basis No. 2 Canada Western, in store Fort William/Port Arthur.

Barley—96 cents per bushel basis No. 3 Canadian Western Six-Row, in store Fort William/Port Arthur.

NEW PIPELINE TO COAST

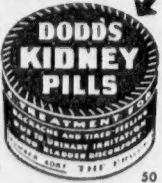

An oil pipeline from the B.C. Block to the coast, new gas and oil wells in the Peace River country are highlights of the week's oil activity. — The Herald Tribune, Grande Prairie, Alta.—April 26, 1957.

SLEEP TO-NITE

SEDICIN tablets taken according to directions is a safe way to induce sleep or quiet the nerves when tense. \$1.00 All Drug Stores or Adrem Ltd., Toronto 5.

YOU CAN DEPEND ON

When kidneys fail to remove excess acids and wastes, backache, tired feeling, disturbed rest often follow. Dodd's Kidney Pills stimulate kidneys to normal duty. You feel better—sleep better, work better. Get Dodd's at any drug store. You can depend on Dodd's.

Now Many Wear FALSE TEETH With Little Worry

Eat, talk, laugh or sneeze without fear of insecure false teeth dropping, slipping or wobbling. FASTETII holds plates firmer and more comfortably. This pleasant powder has no gummy, gooey, pasty taste or feeling. Doesn't cause nausea. It's alkaline (non-acid). Checks "plate odor" (denture breath). Get FASTETII at any drug counter.

Quick, Easy Way to Shrink Painful Piles

Here is a nice, clean, easy way to get real relief from the nagging distress of swollen, painful piles without the inconvenience of ointments, pile pipes or suppositories. The secret is in taking just one small Hem-Roid Tablet, with water, two or three times a day. Works through effective INTERNAL action. Quickly eases constipation, relieves itching, soreness and pain. Helps shrink piles and permits them to heal. Why suffer needlessly when Hem-Roid offers you so much. Get a package today. See for yourself how nice Hem-Roid is to use, how effective it is and how much more comfort it will quickly bring you. All drug stores. Low cost. Money refunded if you are not 100% pleased.

This ORANGE and COCONUT CAKE is so easy to make!

Prepare
1 1/2 tps. grated orange rind
1/2 c. cut-up shredded coconut
Sift together twice
1 1/2 c. once-sifted pastry flour
or 1 1/2 c. once-sifted all-purpose flour
2 1/2 tps. Magic Baking Powder
1/2 tsp. salt
Cream
7 tps. shortening

Gradually blend in
1 c. granulated sugar
Add, part at a time, beating well after each addition
2 well-beaten eggs
Stir in grated orange rind and coconut.
Combine
3/4 c. milk
1/2 tsp. vanilla

Add dry ingredients to creamed mixture alternately with milk, combining after each addition. Turn into greased 8-inch square cake pan, lined in bottom with greased waxed paper. Bake in a moderate oven, 350°, 50 to 55 minutes. Frost cold cake with Orange Butter icing.

You get lighter, more delicious baked goods when you use MAGIC Baking Powder. Dependable MAGIC protects all your ingredients. Buy MAGIC today!

Level Land

Mr. and Mrs. John Leiske left Sunday afternoon for California to attend the graduation class of 1957. Marjorie, their daughter, is one of the 218 students graduating. Others accompanying them were Jerry Leiske, Dorothy Bechthold, Larry Leiske and Mrs. Emil Berreth.

Pastor Schultz was the guest speaker at the S.D.A. Church on June 1.

Larry Leiske arrived home from his school term at Walla Walla College, Washington.

Wayne Leiske and Lorne Gramms, Jerry Kindopp and Art Bogden were home visiting with their parents and friends.

Mr. and Mrs. John Leiske and Mr. and Mrs. Theo Bechthold and Mother Vorrath motored to Medicine Hat on Friday May 31 to visit with Reverend and Mrs. Fred Vorrath who are leaving in the early part of June for Flint, Michigan where he will serve a big church.

Alex Vorrath of this district left for Medicine Hat to attend the Conference of the Evangelical Church and will return home Sunday.

HOW MUCH DO YOU KNOW ABOUT BASEBALL?

Rule makers decided that base stealing is a lively part of the game and should be encouraged so they placed limitations on the pitcher via the balk rule that gave the base runners a fair chance with the team in the field.

The balk rule is an aid to the umpire in keeping the game in progress, especially when the team in the field attempts to stall and gain an advantage due to time limits and weather conditions. It also forces the pitcher to pitch according to a well defined pattern, and keeps the pitcher in his proper position on the mound and prevents the pitcher from taking advantage of the batsman.

When the pitcher violates the pitching rule when the bases are unoccupied, it is referred to as an illegal delivery.

When the pitcher violates the pitching rule when one or more bases are occupied, it is referred to as a balk.

It is impossible for a pitcher to make a balk when the bases are unoccupied.

It is noticeable that the pitcher, while off the rubber, may bluff to throw to any occupied base without stepping toward that base and it is not a balk.

While off the rubber, the pitcher may throw to any occupied base without stepping toward that base and it is not a balk.

It is noticeable that when the pitcher is in legal pitching position on the rubber, he may bluff to throw to 2nd or 3rd base and it is not a balk, providing of course, that he step toward that base as he bluffs the runner back.

It is noticeable that, when the pitcher is in legal pitching

position, that it is always a balk to bluff to throw to 1st base, it would make no difference if he did or did not make the step toward 1st base as he bluffed the runner back, it is a balk.

Runner on 1st base, the pitcher takes legal pitching position on the rubber and delivers the ball to the batsman while not facing the batsman. Q. Is this a balk?

A. Positively yes, the pitcher may look at any or all base runners after taking legal pitching position, however, the pitcher must face home plate when he delivers the ball to the batsman or suffer the penalty of a balk.

The reason for this ruling is that a clever pitcher may continue to look at a base runner while in motion to deliver the ball to the batsman, and thereby have a tendency to hold base runners closer to their bases.

Here is food for thought. There are no runners on base. The pitcher's pivot foot leaves the rubber before the ball leaves his hand as he pitches to the batsman. Each pitch is called a ball until the batsman is walked to 1st base. With a runner on base each pitch as described above is a balk.

After the pitcher takes legal

pitching position on the rubber he may use the wind up in delivering the ball to the batsman at any time. It does not make any difference if the bases are or are not occupied by base runners, however, when one or more bases are occupied it places the pitcher at a great disadvantage to use the wind up.

Q. What is this disadvantage? A. When the pitcher starts his delivery with a wind up he must deliver the ball to the batsman or suffer the penalty of a balk. The wind up gives base runners more time in which to steal to the next base on a pitch.

One or more runners are on base. The pitcher delivers the ball to the batsman but does not use the stretch.

Q. Is this a balk?

A. Positively not. There is no ruling in baseball that compels the pitcher to use the stretch. The ruling is that should he use the stretch when one or more bases are occupied he must always come to a stop.

RESEARCH AND THE SEED GROWER

The Province of Alberta is privileged this year in that it will be the scene of the 1957 annual meeting of the Canadian Seed Growers' Association.

Meeting at the Banff School of Fine Arts on June 19, 20 and 21, elite and registered seed growers will discuss matters of common interest and review seed production regulations with a view to still further improving their services to the Canadian farmer and Canadian agriculture generally.

Members of the Canadian Seed Growers' Association provide an important link between the plant breeder and the farmer, says A. A. Guitard, Cerealist at the Beaverlodge Experimental Farm. Any variety, no matter what it is worth, is of little value unless pure stocks are available.

The first step in maintenance of quality after its establishment by the plant breeder is elite stock production. The elite seed grower receives foundation stock from the institution named by the Canadian Seed Growers' Association to produce that stock. The Beaverlodge Experimental Farm, for instance, is the only place in Canada where foundation stock of Olli barley and Saunders wheat are produced. From the elite grower, first generation registered seed is passed on to the registered grower, who increases it on a large scale for distribution to commercial growers.

Elite grower members of the Canadian Seed Growers' Association have a special responsibility, Mr. Guitard advises. Before a member can be accepted as a probationary elite grower he must have had several years experience in the successful production of registered seed. If he has not grown elite stock previously he must undergo a three year probationary period. He receives enough seed to produce one acre of elite stock and he must use that seed for a second and again during a third year and maintain its purity throughout.

Elite stock is not a salable product; from elite is produced first generation seed, the purest seed available to the non-elite seed grower. From the elite seed grower first generation seed goes to the registered grower and here again quality must be maintained and the seed kept up to inspection standards. Inspections are conducted by staff of the Plant Products' Division of the Canada Department of Agriculture and it is on the basis of their reports that crop registration certificates are issued by the Canadian Seed Growers' Association. Regulations are necessarily strict. Of 14,500 fields inspected in 1955, 11,500 only were of sufficiently high stan-

The right man in the right job

LOUIS ST. LAURENT sees for Canada's future an exciting adventure of national development . . . to provide here in this rich land a more abundant life for all our people.

Under his leadership, our population has increased over 25 per cent . . . a million new homes have been built . . . our standard of living is higher . . . and national developments underway will bring great benefits to every part of our land.

Above all, Louis St. Laurent knows and understands the needs of our people. The Government he leads has provided greater social protection to the Canadian people . . . social security benefits have been increased . . . federal legislation for a nation-wide system of hospital insurance has been proclaimed.

Canada's progress shows that Louis St. Laurent is the right man in the right job. Vote for your Liberal candidate and keep Louis St. Laurent at work helping to create a better life for all Canadians.

For a greater Canada...for tomorrow's opportunities...
